

## **Database Administrator**

We are looking for a gifted Database Administrator who has at least 2 years professional experience in setting up and maintaining SQL Server Databases. Apart from routine jobs such as installation, fine tuning, backup and redundancy we will also offer opportunity to grow and learn new technologies.

### **Primary job tasks:**

- Setup and maintain internal and external database solutions
- Assist the CTO in client product solution design and implementation
- Create and document procedures and infrastructure
- Create and maintain a high level of quality.
- Backup, recovery and clustering.

### **Experience in the following is plus:**

- UML Design
- Oracle, MySQL, PostgreSQL
- Linux
- SQL Analysis Services
